EDUCATION

B.Tech in Computer Science (Artificial Intelligence and Machine Learning)

Dronacharya College of Engineering, Gurgaon, India

July 2023 – June 2027

CGPA: 7

Senior Secondary Education (12th)

S.D. Public School, Patel Nagar, New Delhi

April 2021 – May 2022

Percentage: 65%

Secondary Education (10th)

S.D. Public School, Patel Nagar, New Delhi

April 2019 – March 2020

Percentage: 80%

ABOUT

- Passionate Computer Science student with hands-on experience in REST API testing, database validation and debugging production systems. Skilled in Python, JavaScript and SQL with a keen eye for detail and a strong ability to identify and communicate software issues effectively.

SKILLS

Languages: C, Python, HTML, CSS, JavaScript, Java

Frameworks: Node.js, Express.js, ReactJS, Tailwind CSS

Databases & Tools: PostgreSQL, MySQL, MongoDB, Prisma ORM, Postman (API Testing), Git

Cloud & DevOps: Render, Neon DB

Soft Skills: Attention to Detail, Analytical Thinking, Team Collaboration, Written & Verbal Communication

WORK EXPERIENCE

Backend Developer Intern

[23/03/2025] – [23/05/2025]

Rehabiphy Pvt. Ltd., Remote

- Built and tested production REST API backend for a physiotherapy platform; manually validated API endpoints using Postman to verify correctness and edge cases
- Performed zero-downtime PostgreSQL database migration with thorough validation of data integrity and cross-environment compatibility
- Identified and resolved bugs in referral system, calorie calculation engine and automated cron jobs; tracked all fixes through to closure

Tech Stack: Node.js, Express.js, PostgreSQL, Prisma ORM, Neon DB, Render, JWT, node-cron

CERTIFICATIONS

- **June 2025:** Data Analytics Job Simulation – Deloitte
- **June 2025:** Technology Job Simulation – Deloitte
- **Jan–Apr 2026:** NPTEL Deep Learning – 67%

PROJECTS

Mental Distress Detection System — Python, Scikit-learn, OpenAI Whisper Developed an AI-powered system to detect emotional distress from voice recordings using Speech Emotion Recognition and NLP. Trained a Random Forest model on the RAVDESS dataset using MFCC, Chroma, and Zero Crossing Rate audio features extracted with Librosa. Integrated OpenAI Whisper for speech-to-text transcription and combined audio and text analysis for distress detection.

Built a web application using Flask and Streamlit for real-time audio upload, transcription, and emotion analysis. **Tech Stack:** Python, Scikit-learn, Librosa, NumPy, Pandas, OpenAI Whisper, Flask, Streamlit, Git/GitHub

Intelligent Customer Support Chatbot – Built a conversational AI chatbot for real-time customer queries using NLP. Implemented intent classification and entity recognition with BERT-based models, designed dialogue management for contextual responses and integrated into a web interface.
