EDUCATION

B.Tech in Computer Science (Artificial Intelligence and Machine Learning)

Dronacharya College of Engineering, Gurgaon, India

July 2023 – June 2027

CGPA: 7

Senior Secondary Education (12th)

S.D. Public School, Patel Nagar, New Delhi

April 2021 – May 2022

Percentage: 65%

Secondary Education (10th)

S.D. Public School, Patel Nagar, New Delhi

April 2019 – March 2020

Percentage: 80%

ABOUT

- Passionate Computer Science student with hands-on experience in backend development and AI/ML. Skilled in building production-grade REST APIs, database management and real-world software deployment.

SKILLS

Languages: C, Python, HTML, CSS, JavaScript, Java

Frameworks: Node.js, Express.js, ReactJS, Tailwind CSS

Databases & Tools: PostgreSQL, MySQL, MongoDB, Prisma ORM, Postman, Git

Cloud & DevOps: Render, Neon DB

Soft Skills: Leadership, Time Management, Analytical Thinking

WORK EXPERIENCE

Backend Developer Intern

[23/03/2025] – [23/05/2025]

Rehabiphy Pvt. Ltd., Remote

- Built and maintained production REST API backend for a physiotherapy platform connecting therapists with patients across India
- Executed zero-downtime PostgreSQL database migration resolving IPv4/IPv6 cloud compatibility issues
- Developed referral system with instant coin rewards, fraud prevention and badge progression; therapist subscription tiers (Basic/Pro/Elite); calorie calculation engine and automated cron jobs for session management and leaderboard resets

Tech Stack: Node.js, Express.js, PostgreSQL, Prisma ORM, Neon DB, Render, JWT, node-cron

CERTIFICATIONS

- **June 2025:** Data Analytics Job Simulation – Deloitte
- **June 2025:** Technology Job Simulation – Deloitte
- **Jan–Apr 2026:** NPTEL Deep Learning – 67%

PROJECTS

Mental Distress Detection System — Python, Scikit-learn, OpenAI Whisper Developed an AI-powered system to detect emotional distress from voice recordings using Speech Emotion Recognition and NLP. Trained a Random Forest model on the RAVDESS dataset using MFCC, Chroma, and Zero Crossing Rate audio features extracted with Librosa. Integrated OpenAI Whisper for speech-to-text transcription and combined audio and text analysis for distress detection. Built a web application using Flask and Streamlit for real-time audio upload, transcription, and emotion analysis. **Tech Stack:** Python, Scikit-learn, Librosa, NumPy, Pandas, OpenAI Whisper, Flask, Streamlit, Git/GitHub

Trader Behavior vs Market Sentiment Analysis – Web3 Trading Firm Data Science Take-home (Nov 2025). Analyzed Hyperliquid trades and Bitcoin Fear & Greed Index to reveal how profitability, leverage and risk-taking shift in extreme market regimes. Built full EDA and visualization pipeline using Python, pandas and seaborn in Google Colab.

Intelligent Customer Support Chatbot – Built a conversational AI chatbot for real-time customer queries using NLP. Implemented intent classification and entity recognition with BERT-based models, designed dialogue management for contextual responses and integrated into a web interface.
